

please allow this law to stay in effect. I pay to have a private number. I still get telemarketing calls even being on the list. I feel I have a right also not to be bothered by the telemarketers calling if I have not requested calls. Too many scams out there and many people are taken advantage of. When I mention I am on the do not call list they hang up. We should be protected too and it's too bad in that industry is upset about it!
